

# Neatform

## Veneered Neatform

Neatform is the perfect way to create curved wooden surfaces

Pre veneered boards are machined with standard Neatform grooving or intermittent grooving if flat and curved surfaces are to be combined.

A full range of veneers is available in sizes as specified for particular applications. Overleaf are given the standard species held available in size 2420 x 1210 x 6mm with grooving available in long or cross cut.

The new range has found ready acceptance for the production of reception desks, bar fronts and other curved surfaces.

product information
